Subject: review of Bingham reclamation update

Wayne,

I have finished my comments and overall review of comments from the other staff for this document. The document is under o:\kenncott\m35-02rp.ltr. The cover letter and comments will need more refinement to be consistent and avoid redundancy.

I suggest you read through the review and think about our response strategy before making edits. It may be helpful to spend 30 minutes as a group discussing what approach we want our response to take before you get too far into editing.

I'll put the submission and copy of our review in your IN BOX. I have calls into state history regarding implications of the national historic listing.
